## FISHING GUIDE

### WELCOME...

to the brand-new Edges 'How To' Guide your one-stop shop for mastering the basics of carp fishing.

The aim of this new guide is to arm you with lots of short bursts of information that will not only help you to catch more carp but also ensure that when you do catch the fish they are cared for correctly too. We have focussed on making the guide very picture-heavy to give lots of visual guidance on how to master a number of tactics. Often much of the information in circulation these days be it in magazines or online is aimed at the more experienced angler and takes many of the basics for granted so we were keen to strip things back and help any newcomers to carp fishing to get things right from the off!

The second half of the guide is a classified look at our whole Edge range of accessories, for those of you in the market for new accessories that have been designed by carp anglers to help other carp anglers catch more carp you are sure to find this section very valuable...

We really hope you enjoy what's in store for you over the coming pages...

# HOW TO:

# PICK A SWIM

**If you want the best chance of success then swim choice is crucial!**

**DON'T just:**

- Go next to the car park
- Go next to a friend
- Pick the cleanest, most comfortable swim

The number one thing to look for is the carp themselves - if you can find the fish then your chances of catching them are much higher. So we suggest spending time walking around the venue, looking for clues where the carp are - once you find the fish - select the swim that is closest to them.

**What to Look for:**

- Swimming carp in clear water
- Jumping/ head and shouldering
- Swirling/ tail patterns
- Bubbles/ fizzing
- Coloured/ cloudy water

**TOP TIP!**

When trying to locate the carp, a pair of polarised sunglasses reduces surface glare making it easier for you to spot the key sign...

**No Signs of Carp? Then Look for:**

Islands

Weedbeds/ snags

Aerators or inlet pipes

Marginal cover

**Also consider weather-based choices:**

- End of warm wind
- Back of cold wind
- Shallow water in warm weather
- Deeper water in colder weather

# HOW TO:

# EDGES

## FIND A

# FEATURE

**Having selected a swim, you will now need to find some features where to present your hookbaits...**

Start by casting a marker float setup on braided line around your swim to try get any idea of what is on the lakebed. We recommend exploring areas close to the visual features in your swim such as islands, snags, weedbeds, reeds etc

### Things to look for:

- ✓ Tapping on rod tip as lead moves along lakebed = **Gravel**
- ✓ Heavy resistance trying to retrieve lead = **Deep silt or weed**
- ✓ Lead gliding along the lakebed = **Sand, clean silt or clay**

Many anglers like to fish on gravel spots or on the clean clay, silt or sand spots, and we would recommend to start by fishing such features. Once you have located these features, let line off the reel 1ft at a time and count how many feet it takes for the float to hit the surface - by doing this you can locate shallower areas as well a deeper channels - carp like to patrol features so fishing on the side of bars or on top of plateaux's can be a real advantage.

### HOW TO:

### Set Up a Marker Float...

**1** Start by threading your boom from the Marker Float Kit onto the braided main line

**2** Thread the round buffer bead onto the braided line followed by the other bead in the kit

**3** Tie the end of your braided line to the swivel at the base of the marker float with a Grinner Knot

**4** Slide the bead over the eye of the swivel as illustrated in the picture above

**5** Attach your lead to the quick change clip on the boom section and cover with the sleeve

**6** You now have a marker float set-up ready to be used to locate some underwater features

### TOP TIP!

Try casting a Grappling Marker Lead to your chosen area to see if you retrieve any weed or debris.

### TOP TIP!

Use Marker Sticks and count how many wraps the spot is from the bank.

### TOP TIP!

Keep a record of all of your vital information in your Swim Mapper APP.

**HOW TO:**

# BAIT

## THE SPOT

### Different Tools for Baiting Up:

**Spod**  
Perfect for all manner of baits at medium to ultra-long range

**Throwing Stick**  
Purpose-designed for boilies at medium to long range

**Catapult**  
Ideal for variety of baits at short to medium range

**Baiting Spoon**  
Great for all manner of baits as very close range

With some interesting features located the next step is to introduce some bait to the spot...

## Bait Accurately

In order to ensure you bait accurately it is worth casting your marker float to the spot and let the float rise to the surface. You can then use this as a target to aim your free feed around.

When using a spod cast it next to the float and then place the line in the clip of your reel - this will ensure the same distance is hit on every cast. Also make sure you wrap the line around your marker sticks and pick a feature on the far bank to aim towards each time, ensure you record this information in your Swim Mapper APP for future reference.

## Top Baits to Try:

**Boilies** - carp adore them and they are great for withstanding attentions of small species

**Sweetcorn** - all-time classic that is a firm favourite of the Fox angling consultants

**Parti-blend** - another great bait for spod mixes but often attracts smaller species

**Tiger nuts** - use in moderation, great for avoiding attention of bream, tench and crayfish

**Pellets** - carp absolutely love pellets and they are great in spod mixes and PVA bags too

**Maggots** - a great bait in winter but not ideal on lakes that have species other than carp

## HOW TO:

### Create an Effective Spod Mix...

1 Start by adding 2kg of sweetcorn to a bucket

2 Next add 1kg of boilies - both whole and crumbed

3 Now add 1kg of particles such as pigeon conditioner

4 Finally add 1/2 kg of pellets, give it a stir and your mix is ready

Get your baiting right and the results can be spectacular!

## TOP TIP!

We recommend that you feed little and often rather than putting in a massive amount of bait at the start of a session. Remember you can put it in but you cannot take it out!

## TOP TIP!

If spodding make sure you use a fingerstall to protect your casting finger from the thin braid.

**HOW TO:**

# CAST ACCURATELY

**TOP TIP!**

Once you have found the spot you wish to cast to, place the main line into the clip on your reel.

**TOP TIP!**

Use some Marker Sticks to record or the distance at which you are fishing for future reference.

**TOP TIP!**

Add some Marker Elastic to your line so you don't have to wrap out your rods on every re-cast.

Whether you are feature-finding, casting out a baited rig or baiting with a spod, the more accurate you are the more successful you will become...

### Cast Accurately

Now casting accuracy isn't really that important if you only ever fish with a bait boat or a rowing boat, but for the vast majority of anglers across Europe who do rely on casting to fish for carp it really is a key skill that will not only catch you more carp but also save you money too (less tackle lost casting into trees etc). There are a few basic principles to follow, which if you do, will have you casting 'on the money' time after time.

### Handy Items To Have:

- ✓ Distance Sticks
- ✓ Marker Elastic
- ✓ Polarised Sunglasses
- ✓ Marker Float Set-up

Accurate anglers become successful anglers!

**TOP TIP!**

Pick a prominent feature on the far bank that you will cast towards - make sure it will be noticeable at night as well.

**TOP TIP!**

Use the Swim Mapper APP to record your distance and far bank marker for future reference.

**TOP TIP!**

Always stand in the same place for every cast and make sure you always aim towards your far bank marker.

**TOP TIP!**

When hitting the clip make sure you hold the rod in the same place every time to ensure pin-point accuracy.

**HOW TO:**

# TIE A POP-UP RIG

## Here is an overview on how to create a highly effective pop-up rig presentation...

Pop-up presentations are especially effective when fishing over a lakebed that isn't clean. It may have low-lying weed, soft silt or debris, which would impair your presentation if you were to fish with a bottom bait. There are a wide variety of pop-up presentations available but the one we are focussing on in this section is a firm favourite with the Fox consultant's team across Europe...

### Other Pop-Up Rigs to Consider:

Withy Pool Rig

Multi Rig

Hinged Stiff Rig

Chod Rig

## The 360 Rig

Without a doubt one of the most effective, anti-eject pop-up rigs ever invented. The 360 Rig allows the hook to spin a full 360 degrees making it extremely hard for a carp to blow it out with the point catching hold of its mouth. It is a low-lying pop-up as it is only the length of the hook above the lakebed meaning it is very discreet as pop-up rigs go.

### Components Needed:

Edges Medium Curve Hook

Size 11 Flexi Ring Swivel

Micro Hook Ring Swivel

Hook Beads

Coretex Tungsten Hooklink

Tungsten Anti Tangle Sleeve

### HOW TO:

### Tie the 360 Rig...

1 Start by tying one end of the Coretex Tungsten to the ring of the size 11 Flexi Ring Swivel

2 Now thread the point of your Medium Curve hook through the end eye of the Flexi Ring Swivel

3 Take one of the Hook bead and thread it into this position on the shank of the hook

4 Thread a Micro Hook Ring swivel onto the hook shank followed by a second Hook Bead, like so

5 Cut the hooklink to your chosen length and thread on one of the Tungsten Anti Tangle Sleeves

6 Now tie a figure-of-8 loop in the end of the hooklink and attach your chosen pop-up to complete!

Nailed on a 360 Rig!

### TOP TIP!

Tungsten Putty and Kwik Change Pop-Up Weights can come in very handy when you need to counter balance your pop-up hookbaits.

### TOP TIP!

If you are presenting your pop-up over fairly thick silt or weed then a helicopter lead arrangement will aid your presentation.

### TOP TIP!

Adding a small dissolvable High Riser foam nugget helps prevent tangles on the cast. The nugget will dissolve and the rig will slowly flutter to the lakebed.

**HOW TO:**

# TIE A **BOTTOM** BAIT RIG

Bottom baits can be highly effective on their day!

**If you are looking for a highly-effective bottom bait rig to try on your next session then look no further...**

Bottom bait presentations have become less fashionable these days as many anglers tend to opt for Ronnies, the 360, Chods or Hinged Stiff Rigs. This doesn't mean they are any less effective, in fact with the vast majority of anglers using pop-ups these days there is a lot to be said for trying a bottom bait presentation that the carp may well be less cautious of. Bottom baits can have their restrictions depending on the lakebed you are fishing over, but as long as the weed isn't too thick then the presentations in this section will be more than effective for you...

**Other Bottom Bait Rigs to Consider:**

Standard Knotless Knot

KD Rig

Claw Rig

D-Rig

## The Blow Back Rig

The Blow Back Rig is an all-time classic presentation that is capable of nailing any carp on its day. The rig can be fished with a straight bottom bait, a waffer or a snowman rig comprising a sinking bottom bait with a buoyant hookbait on top. The rig features a small ring on the shank of the hook which allowed the hook to stay in place and catch hold of the bottom lip when a carp tries to eject the hookbait.

## Components Needed:

Edges Wide Gape hook (Straight or Beaked it's your choice)

Micro Line Aligna

Large Kuro Rig Ring

Camotex Semi-Stiff hooklink

Tungsten Anti Tangle sleeve

Tungsten Rig Putty

## HOW TO:

### Tie the Blow Back Rig...

1 Start by cutting 12ins of Camotex Semi-Stiff and strip away 4ins of out coating from one end

2 The next step is to tie a small overhand loop into the end of the exposed braided section

3 Thread your chosen sinking hookbait onto the loop of braid and secure in place with a boilie stop

4 Tie the Large Kuro Rig Ring 5mm above the hookbait with two overhand knots like so

5 Thread the ring onto your hook and into the position shown in the image above

6 Secure the hook in place with a Knotless Knot (remember to always exit the eye from the front)

7 Slide a Micro Line Aligna down the hooklink and into position over the eye of the hook, as shown

8 Thread on the Anti Tangle Sleeve, and then tie a Figure-of-Eight loop in the end of the hooklink

9 Finally, add a couple of blobs of Tungsten Rig Putty along the hooklink to complete

## TOP TIPS!

Fishing your bottom bait rig in conjunction with a PVA bag, stringer or stick can give extra attraction around the hookbait.

When fishing on particularly clean, hard lakebeds try using an Impact Inline Lead to maximise your self-hooking efficiency.

**HOW TO:**

**USE**

**PVA**

**PVA has revolutionised the way carp anglers have fished since its introduction into carp fishing many years ago - here we show you how to get the best out of it!**

### **What is PVA?**

PVA stands for Polyvinyl Acetate and it comes in many forms for fishing such as string/tape, strips, mesh and solid bags. The beauty with this product is that it fully dissolves when in water, which lends itself to many uses from bait presentation to lead ejection. For example anglers can create a PVA bag filled with free food such as pellets and boilies and attach it to their rig. Then once cast into the water the PVA melts leaving a small pile of attractive food around the hookbait.

# PVA MESH

## PVA Mesh

By using the PVA mesh systems that are available it is very easy for anglers to create a quick and simple bag of free offerings that can be attached to the rig - either through simply placing it on the hook or by threading it down the hooklink and over the hook.

## PVA Mesh Uses:

**Simple PVA Bag** - ideal for boilie crumb, pellets and maggots

**PVA Stick** - created using a compacted oily groundbait

**Stringer effect** - You can create similar effect to PVA string by placing a few boilies in the narrow mesh

## HOW TO:

### Make a PVA Stick...

1 Start by mixing some groundbait and fine micro pellets into a small bait tub

2 Next, add a small amount of PVA-friendly, oily liquid to the bait and stir

3 Take a pinch or two of the oily mix and put it into the dispenser of the Edges Stix System PVA Mesh

4 Take the plunger tool supplied in the Stix System and compress the bait into the dispenser

5 Now push the compressed mix out of the bottom of the dispenser like so

6 Tie of the stick with an overhand knot, tie a second knot 5mm above that and cut between the two

## TOP TIP!

Thread your PVA stick down your hooklink and over the hook - this will prevent tangles on the cast and also stop your hook from getting masked on the lakebed, ensuring your hookbait has attraction right around it.

# SOLID PVA

## Solid PVA

Solid PVA bag fishing has grown massively in popularity in recent years, in no small part due to the introduction of our Rapide Load System, which made tying this previously tricky bags far more simple. The main way to fish a solid bag is with a short braided hooklink and an inline lead. You then place the rig and lead inside the solid PVA bag along with some free offering such as micro pellet, groundbait and maggots.

## Benefits of Solid PVA Bags:

- ✓ Rig cannot tangle on cast
- ✓ Rig will be presented effectively over pretty much any lakebed
- ✓ Aerodynamic so can be cast a long way and also very accurately
- ✓ Allows your hookbait to be sat right in amongst a highly attractive pile of bait

## HOW TO:

### Make a Solid PVA Bag...

1 Take an Edges Rapide Loading Tool and place the collar on it like so

2 Place the tool into the top of a Rapide Solid PVA bag and remove the collar

3 Next place your hooklink into the bag, trapping your leader into the groove of the tool

4 Place a small amount of pellet into the bag and then lower your lead on top of it

5 Put some more pellets on top of the lead and then turn the tool to twist the top of the bag

6 Lick around the whole of the PVA that is still on the tool, like so

7 Push the tool down over the PVA bag, transferring the sticky wet PVA to the outside of the bag

8 As you can see the bag is now secured without any knots in the top!

9 Finally lick and stock the bottom corners over to create an aerodynamic parcel

## TOP TIP!

Try injecting some PVA-friendly oil into your solid PVA bag to give extra casting weight and attraction.

There's no doubting that PVA can give you a real edge!

# PVA TAPE

## PVA Tape

PVA tape is a very versatile product that all carp anglers should carry in their tackle boxes.

## PVA Tape Uses:

Create a classic PVA stringer by threading a few boilies onto the tape

Use the PVA tape to tie off a solid bag in the traditional manner

Use PVA tape to secure your lead on a lead clip when fishing without a tail rubber

## PVA Strips

The Edges PVA Strips are designed for the specific use in creating drop-off lead presentations for both running and helicopter rigs.

### HOW TO:

## Create a Drop Off Helicopter Rig...

1 Thread a 5mm Tungsten bead onto your naked line followed by a Tapered Main Line Stopper

2 Slide the swivel of your chosen hooklink onto the main line as shown

3 Next thread the top cap from the Edges Drop Off Heli Buffer Bead Kit onto the line

4 Thread the line protector part of the Drop Off Heli Buffer Bead Kit onto the main line

5 Tie your main line to the metal loop that is moulded into the main part of the bead

6 Push the swivel of your chosen lead inside the bead so the swivel matches up with the hole in the bead

7 Place an Edges PVA Strip through the hole of the bead and eye of the lead swivel like so

8 Trim the excess of the PVA Strip so you are left with a section as shown in the picture above

9 Once in the water the PVA will melt allowing your lead to eject when you get a bite

**HOW TO:**

# FISH **ZIG** RIGS

**Zig Rigs are without any doubt one of the most effective ways to catch carp - here we show you how...**

**TOP TIP!**

Zig Rigs tend to be fished on lead clip set ups so that the lead can eject on the take to make playing and landing a fish much easier.

**TOP TIP!**

When fishing hooklengths over 12-14ft it can be far easier to use an Adjustable Zig Rig which is easier to cast as well as play and land fish on.

## Zig Rigs

There is no doubting that the humble Zig Rig has changed the way many anglers across Europe fish and indeed their views on the feeding habits of carp too. Long gone are the days of blanking if the carp are not willing to feed on the lakebed or surface, thanks to the Zig Rig anglers are now suspending buoyant hookbaits on long hooklinks at all manner of depths through the water column and catching far more fish as a result...

## Components Needed:

Edges Zig & Floater Hook

Zig & Floater Hooklink

Zig Aligna Kit

Anti Tangle Sleeve

## HOW TO:

## Tie a Zig Rig...

1 Start by threading your chosen colour of Zig Aligna onto the end of your hooklink material

2 Take your preferred size of hook and attach it to the end of the hooklink with a Palomar Knot

3 Trim away any tag ends and then slide the Zig Aligna over the eye of the hook and into this position

4 Use the loading tool supplied in the Zig Aligna Kit to insert your chosen foam into the loop on the Aligna

5 Take a pair of scissors and carefully trim the foam to your required size of hookbait

6 Cut the hooklink to your chosen length, thread on an anti tangle sleeve and tie a loop in the end to complete

## TOP TIP!

If you are going to try Zigs try them on all of your rods rather than just one so you give yourself the best chance of success.

## TOP TIP!

Try experimenting with different depths and hookbait colours until you find the depth and colour that works best on the day.

## TOP TIP!

On lakes that are highly stocked you can get more bites by spodding a wet, sloppy mix over the top of your Zig hookbait.

## TOP TIP!

Fish with bow-string tight lines, a quiver-style indicator and your alarms on maximum sensitivity to ensure you get the best bite indication possible.

**HOW TO:**

# FISH SNAGS

**TOP TIP!**

Always fish on the edge of the snags closest to your swim. Also remember when casting to use the clip on your reel and stand in the same place so you don't cast into the snags!

**TOP TIP!**

Try feeding a small amount of free offerings in the snag and create a line of bait all the way to your hookbait to build up the carps confidence.

**TOP TIP!**

Use strong and reliable end tackle with high abrasion resistance properties so if it does come into contact with a snag you aren't easily cut-off.

**Carp absolutely love the protection and cover offered by snags and here we show you how to target them in these areas in a safe and effective manner...**

## Fish Snags

Snags come in all shapes and sizes and for the purpose of this article we will generalise snags as being things such as sunken trees, dense weed/ reed beds, lily pads plus other types of sunken/part sunken structure. Carp love these areas as they feel safe in them and will often spend hours and even days on end relaxing within these structures. The key for us anglers is to coax them from the safety of the snags to feed and hopefully get hooked. Anglers should never fish directly in the snags as this is not safe and can lead to the carp being injured, however we can fish close to the edge of the cover as long as we do it in the correct manner...

## Types of Snag:

Sunken trees

Lily pads

Dense weedbeds

Reedbeds

**TOP TIP!**

Fish with a bow-string tight line and with your clutch on your reel completely 'locked up' - this means that no line whatsoever can be taken from the reel so a hooked fish cannot find the sanctuary of the snags.

**TOP TIP!**

Position the butt ring of your rod behind your bite alarm and use snag ears so that your rod cannot be pulled in on the take by a hooked fish.

**TOP TIP!**

Set up right next your rods and don't leave them unattended. Lift the rod as soon as you get a bite and walk backwards with the rod up high to turn the fish and lead them away from danger.

**TOP TIP!**

Use a lead set-up that allows the lead to eject should it come into contact with the snag. This will give you a far higher chance of safely landing the fish.

**HOW TO:**

# DISTANCE CAST

Often on the larger venues pressured carp can spend a lot of their time out at long range from the bank therefore on such venues the ability to fish effectively at long distances can be a massive advantage...

A lovely carp caught at distance

## Distance Cast

Firstly it is important to establish what we mean by distance. We believe for the average carp angler casting over 100yds (90m) would constitute fishing at distance and therefore the tips and tactics we will share in this section will be aimed at helping you fish at 100yds+. Many anglers actually over estimate how far they can cast and if you think you can already fish at 100yds+ then it is worth casting out, placing your line in the clip on the reel before winding back in. Then position to marker sticks 12ft (4yds) apart and count how many wraps of line go around then sticks until you hit the clip. If it is more than 25 wraps then you are fishing in excess of 100yds. If you are currently not able to reach such ranges then read on...

## Tackle Required:

High test curve rods - ideally 12ft 3.25lb or above

Shockleader - 3-4 turns on the reel to prevent crack offs

Big pit style reels - larger the spool the better

Weight forward, aerodynamic lead - 3.5oz or above

Low diameter, supple line - braid or mono ideally

## Perfecting the right technique...

1 With your feet shoulder-width apart, your front foot faces the direction in which you will cast

2 Keep both of your arms as straight as possible

3 Lean back so your weight is on your back foot

4 Use your bottom arm to pull the butt of the rod in towards your body as fast as possible

5 Use the top arm to push the rod towards your target

6 Transfer your weight from the back foot to the front foot as you make the cast

### TOP TIP!

Always wear a fingerstall when casting long distances, if you don't you could seriously injure your casting finger.

### TOP TIP!

If shockleaders are banned on your target venue then try using tapered monofilament, which has a thicker leader built into the line.

### TOP TIP!

Using helicopter rigs with short hooklinks and smaller hookbaits can help to prevent tangles and increase the distance your cast will go.

### TOP TIP!

If you wish to get some free bait around your hookbait then we would recommend trying a solid PVA bag with some PVA-friendly oil injected into it to make it as heavy and dense as possible.

**HOW TO:**

**IMPROVE**

**BITE**

**INDICATION**

**TOP TIP!**

Set your bite alarm to the highest sensitivity that you can get away with, without getting false indications from wind, rain, under-tow etc.

**TOP TIP!**

If you want to fish with slack lines then use a light weight bobbin such as the Stealth and place your line in the clip/grip of the head to ensure that the bobbin has to move as soon as there is any line movement.

**TOP TIP!**

When fishing at long range or with tight lines (Zig or snag fishing) use either a stiff quiver arm, heavy Swinger or heavy bobbin.

**There is no doubting that location, rigs and bait can all help you to catch more carp, but one aspect that anglers often overlook is the effectiveness of their bite indication...**

## Bite Indication

For the purpose of this guide we are going to look at improving bite indication when legering and using bite alarms as oppose to float fishing or other styles of angling. Due to the way we fish when leadgering we are reliant on the carp to get hooked by the rig rather than the angler setting the hook on the bite. Once a carp picks up the rig and has the hook in its mouth we are then reliant on the bite alarm to inform us and so it is very important that we maximise our indication to ensure that we know that a carp is hooked as quickly as possible.

## Types of Bite Indicator:

**Swinger** - a great all-round indicator that is very effective in windy conditions

**Quiver** - perfect when fishing bow-string tight lines

**Bobbin** - suited for short-to-medium range when using slack or semi-slack lines

**TOP TIP!**

Wherever possible point your rod directly towards your lead so no pivot point is created on tip ring.

**TOP TIP!**

Try to avoid using backleads unless they are absolutely necessary as again this will create a pivot point and reduce the sensitivity of your setup.

**TOP TIP!**

Running rigs allow for the best bite indication possible as the lead is not fixed to the main line and therefore does not act as pivot point.

**TOP TIP!**

Using a line clip on your rod to create a more severe angle between indicator and the alarm will also give improved bite indication.

**HOW TO:**

# CARE FOR YOUR CATCH

**TOP TIP!**

Always have your carp care equipment in position ready for when you catch a fish.

**TOP TIP!**

Ensure your unhooking mat is wet before placing a fish on it.

**TOP TIP!**

Before carrying from the water to the unhooking mat break up the landing net down and roll up the mesh ensuring the fish's fins are lying flat against its body.

**Every carp angler has a duty to the fish that they catch to return them back to their watery home none the worse for their experience. In the modern fishing world there is no excuse for poor carp care...**

## Carp Care

When it comes to practising good carp care there are a number of areas that all anglers should pay attention to. It goes without saying that firstly your rigs should be safe and not cause damage to a hooked fish or risk the fish becoming tethered in the event of a line breakage.

However, once the carp has been landed there are still a number of areas to be mindful of. From transporting the fish from the water to your unhooking mat, to unhooking the fish and having a photograph taken with it, there are simple rules to follow to ensure that you release your prize in the same condition as when you caught them.

## Essential Carp Care Equipment:

Big, padded unhooking mat

Large, wide landing net

Water bucket

Short-term retaining sling

Anti-septic cream/ lotion

**TOP TIP!**

Keep the fish out of the water for as short a time as possible and make sure it is kept wet whilst on the mat.

**TOP TIP!**

Treat the hookhold and any flesh wounds with an anti-septic product to prevent infection.

**TOP TIP!**

If you need to arrange a photographer/photography equipment place the fish in a short-term retaining sling (15-20 minutes maximum).

**TOP TIP!**

Keep the fish low to the ground and over the top of the unhooking mat when having your photos taken.

**NEW**

### PVA MESH SYSTEM

- Highest quality anti-ladder PVA mesh
- System comes supplied with 7m of mesh, loading funnel and a moulded plunger
- Three sizes available: Stix 14mm, Narrow 25mm and Wide 35mm
- Available in Fast Melt for winter use or in shallow water
- Slow Melt options also available for summer use or in deep water
- Supplied in a handy plastic moulded tube to keep everything dry and organised

**NEW**

### PVA MESH REFILLS

- Highest quality anti-ladder PVA mesh
- Designed for refilling your Edges PVA Mesh System
- Three sizes available: Stix 14mm, Narrow 25mm and Wide 35mm
- Available in Fast Melt for winter use or in shallow water
- Slow Melt options also available for summer use or in deep water
- Available in two length options: 5m and 20m

**NEW**

## RAPIDE™ LOAD PVA BAG SYSTEM - FAST MELT

- Eliminates the need for PVA tape to tie the solid PVA bag
- Makes tying a solid PVA bag easier than ever before
- Use the unique tool to fill the PVA bag and tie it too
- Two sizes of loading tool available - Large and Small
- Large tool works with three different sized PVA bags - 85mm x 140mm, 75 x 175mm and 85mm x 220mm
- Small tool works with two sizes of bag - 55mm x 120mm and 60mm x 130mm
- Supplied with orange loading tool, black locking collar, 25 Fast Melt PVA bags (20 for 75mm x 175mm and 85mm x 220mm)
- Supplied in a handy plastic moulded tube to keep everything dry and organised
- System available in Fast Melt only
- Fast Melt and Slow Melt Refills available separately

**NEW**

## RAPIDE™ LOAD PVA BAG REFILLS

- Available in 85mm x 140mm, 75 x 175mm and 85mm x 220mm to fit large loading tool
- Also available in 55mm x 120mm and 60mm x 130mm to fit small loading tool
- Available in Fast Melt for winter use or in shallow water
- Slow Melt options also available for summer use or in deep water
- The Slow Melt bags are increased micron meaning they are thicker and more robust
- Refill bags feature actual sized 2D image on front that represents the perfect size of bag they can make
- 25 bags in 85mm x 140mm, 55mm x 120mm and 60mm x 130mm
- 20 bags in 75mm x 175mm and 85mm x 220mm

**NEW**

## PVA TAPE

- Dissolvable tape that is perfect for a host of applications such as creating PVA stringers and tying off solid PVA bags
- Available in Fast Melt for winter use or in shallow water
- Slow Melt options also available for summer use or in deep water
- 20m of tape on Slow Melt, 40m of tape on Fast Melt

BARBED

BARBLESS

### STIFF RIG BEAKED

- Improved version of the original Arma Point SR design
- Perfect for pop-up presentations such as Chod, Hinged Stiff and Multi Rigs
- Also suited to bottom bait stiff rig presentations
- Utilizes Arma Point technology
- Needle-sharp beaked point
- 25 degree outturned eye for use with super-stiff mono such as Edges Rigidty
- Large eye allows 30lb Rigidity to pass through three times if attaching with knotless knot
- Non-reflective dark coating
- Super-strong yet lightweight XC80 Vanadium forged steel construction
- Barbed sizes available: 2, 4, 5, 6, 7 & 8
- Barbless sizes available: 6 & 8

BARBED

BARBLESS

### STIFF RIG STRAIGHT

- Designed to meet the demands of anglers that prefer straight pointed hooks
- Perfect for pop-up presentations such as Chod, Hinged Stiff and Multi Rigs
- Also suited to Bottom Bait Stiff Rig presentations
- Utilizes Arma Point technology
- Needle-sharp straight point
- 25 degree outturned eye for use with super-stiff mono such as Edges Rigidty
- Large eye allows 30lb Rigidity to pass through three times if attaching with knotless knot
- Non-reflective dark coating
- Super-strong yet lightweight XC80 Vanadium forged steel construction
- Barbed sizes available: 2, 4, 5, 6, 7 & 8
- Barbless sizes available: 6 & 8
- 10 per packet

## CURVE MEDIUM

- Perfect for both bottom bait and pop-up presentations
- Ideally suited for the popular 360 Rig presentation
- Utilizes Arma Point technology
- Needle-sharp straight point
- Inturned eye
- Aggressive medium-length curved shank helps the hook to turn and grab hold in the fish's mouth
- Non-reflective dark coating
- Super-strong yet lightweight XC80 Vanadium forged steel construction
- Barbed sizes available: 2, 4, 5, 6, 7 & 8
- Barbless sizes available: 6 & 8
- 10 per packet

## CURVE SHANK

- Improved version of the original Arma Point SSC design
- Especially suited to bottom bait and wafer presentations
- Utilizes Arma Point technology
- Needle-sharp straight point
- Inturned eye
- Aggressive curved shank helps the hook to turn and grab hold in the fish's mouth
- Non-reflective dark coating
- Super-strong yet lightweight XC80 Vanadium forged steel construction
- Barbed sizes available: 2, 4, 5, 6, 7 & 8
- Barbless sizes available: 6 & 8
- 10 per packet

## CURVE SHORT

- Improved version of the original Arma Point XSC design
- Perfect for both bottom bait and pop-up presentations
- Utilizes Arma Point technology
- Needle-sharp straight point
- Straight eye
- Short, sweeping shank
- Non-reflective dark coating
- Super-strong yet lightweight XC80 Vanadium forged steel construction
- 10 per packet
- Only available in Barbed
- Sizes available: 2, 4, 5, 6, 7 & 8

BARBED

BARBLESS

## ZIG & FLOATER

- Designed specifically for use on Zig and surface rigs
- Also suited to bottom bait stiff rig presentations when scaling down is required
- Utilizes Arma Point technology
- Needle-sharp straight point
- Slightly outturned eye for use with monofilament hooklinks
- Non-reflective dark coating
- Super-strong yet lightweight XC80 Vanadium forged steel construction
- Finer wire gage compared to other Edges hooks due to the delicate presentations they are designed for
- Barbed sizes available: 6, 8 & 10
- Barbless sizes available: 6, 8 & 10
- 10 per packet

BARBED

BARBLESS

## WIDE GAPE BEAKED

- Improved version of the original Arma Point SSBP design
- Perfect for both bottom bait and pop-up presentations
- Utilizes Arma Point technology
- Needle-sharp beaked point
- Beaked point makes hook perfect for bottom bait fishing on hard gravel lakebeds
- 10 degree inturned eye
- Non-reflective dark coating
- Super-strong yet lightweight XC80 Vanadium forged steel construction
- Barbed sizes available: 2, 4, 5, 6, 7 & 8
- Barbless sizes available: 6 & 8
- 10 per packet

BARBED

BARBLESS

## WIDE GAPE STRAIGHT

- Perfect for both bottom bait and pop-up presentations
- Utilizes Arma Point technology
- Long, needle-sharp straight point
- Aggressive 25 degree inturned eye
- Non-reflective dark coating
- Super-strong yet lightweight XC80 Vanadium forged steel construction
- Barbed sizes available: 2, 4, 5, 6, 7 & 8
- Barbless sizes available: 6 & 8
- 10 per packet

## CURVE SHORT RIGS

- Constructed from Edges Coretex Matt coated braid with loop in end for use with quick change swivels
- Featuring Edges Curve Short hooks
- Breaking strain matches hook size: 15lb (6.8kg) with size 8 hook, 20lb (9.07kg) in size 6 and 25lb (11.3kg) for size 4 and 2
- Also feature Trans Khaki Anti-Tangle Sleeves, Trans Khaki Line Aligna Adaptor and Trans Khaki Hook Silicone on Hair
- Supplied with 2x size 7 Swivels, 2x size 7 Kwik Change Swivels and FREE Hair Extending Boilie Props
- 2 rigs per packet
- Micro Barbed-only

## WIDE GAPE RIGS

- Constructed from Edges Coretex Matt coated braid with loop in end for use with quick change swivels
- Featuring Edges Wide Gape Beaked hooks
- Breaking strain matches hook size: 15lb (6.8kg) with size 8 hook, 20lb (9.07kg) in size 6 and 25lb (11.3kg) for size 4 and 2
- Also feature Trans Khaki Anti-Tangle Sleeves, Trans Khaki Line Aligna Adaptor and Trans Khaki Hook Silicone on Hair
- Supplied with 2x size 7 Swivels, 2x size 7 Kwik Change Swivels and FREE Hair Extending Boilie Props
- Two rigs per packet
- Micro Barbed and Barbless options available (Barbless only available in hook sizes 6 and 8)

## WIDE GAPE PVA BAG RIGS

- Constructed from Edges Reflex Camo Braid in Light Camo with a loop in end for use with quick change swivels
- Featuring Edges Wide Gape Beaked hooks
- Breaking strain matches hook size: 15lb (6.8kg) with size 6 and 8 hook, 25lb (11.3kg) for size 4
- Also feature Trans Khaki Micro Line Aligna Adaptor and Trans Khaki Hook Silicone on Hair
- Supplied with 2x size 7 Flexi Ring Swivels, 2x size 7 Kwik Change Swivels, 2x Trans Khaki Micro Anti-Tangle Sleeves and FREE Hair Extending Boilie Props
- 2 rigs per packet
- Micro Barbed and Barbless options available (Barbless only available in hook sizes 6 and 8)

## CHOD RIGS

- Constructed from Edges Rigidity Trans Khaki stiff monofilament
- Featuring Edges Stiff Rig Beaked hooks
- Breaking strain matches hook size: 25lb (11.3kg) for sizes 6, 7 and 8 and 30lb (13.6kg) for sizes 4 and 5
- Also feature Edges Micro Hook Ring Swivel on the D for mounting hookbait onto and a size 11 Flexi Ring Swivel
- Supplied on foam discs that can be loaded straight into your Multi Chod & Zig Bin
- Three rigs per packet
- Micro Barbed and Barbless options available (Barbless only available in hook sizes 6 and 8)
- Available in Standard and Short sizes

## CORETEX™ TUNGSTEN

- Features unique tungsten impregnated outer coating
- Soft, supple, sinking braid inner
- Tungsten coating helps to pin hooklink to lakebed
- Coating is strippable for creation of combi rigs
- Two tone colouring for camouflage
- Available in 20lb and 35lb breaking strains
- 20m per spool

## CAMOTEX™ SOFT

- Ultra-soft, coated braid perfect for bottom bait and pop-up rigs
- Could be mistaken for a normal uncoated braid such is its softness
- Coating and inner braid features colour break camouflage pattern
- Easy to strip outer coating
- Available in two colour options: Light Camo and Dark Camo
- Breaking strains: 15lb (6.8kg), 20lb (9kg), and 25lb (11.3kg)
- 20m on a spool

## CAMOTEX™ SEMI-STIFF

- Semi-stiff coating that sits in between the Camotex Stiff and Camotex Soft
- Perfect for bottom bait and pop-up rigs
- Coating and inner braid both feature colour break camouflage pattern
- We recommend you remove outer coating before tying a knot in this material as it is so stiff the coating could break when knotting
- Steams very straight
- Has great anti-tangle properties
- Easy to strip outer coating
- Available in two colour options: Light Camo and Dark Camo
- Breaking strains: 15lb (6.8kg), 20lb (9kg), 25lb (11.3kg) and new 35lb (15.8kg)
- 20m on a spool

## CAMO-SPLICE

- Spliceable braided hooklink
- Very supple and dense allowing it to pin to the lakebed
- Camouflage colour
- Ideal for creating multi-rigs and splicing hooks/swivels directly onto the hooklink, keeping them clear neat and tidy without knots
- We recommend to use the Easy Splice Needle with this material
- Available in 50lb breaking strain
- 20m per spool

## CAMOTEX™ STIFF

- Ultra-stiff coated braid that is perfect for bottom bait and pop-up rigs
- Coating and inner braid both feature colour break camouflage pattern
- We recommend you remove outer coating before tying a knot in this material as it is so stiff the coating could break when knotting
- Has great anti-tangle properties
- Steams very straight making it great for stiff rigs and boom sections on Hinged Stiff Rig
- Easy to strip outer coating
- Available in two colour options: Light Camo and Dark Camo
- Breaking strains: 15lb (6.8kg), 20lb(9kg), and 25lb (11.3kg)
- 20m on a spool

## CORETEX™ MATT

- Based on original Coretex but with an improved matt coating to reduce glare in water
- Perfect for a wide variety of rig presentations
- Semi-stiff coating aids anti-tangle properties and allows for combi rig presentations to be created
- Easy to strip outer coating
- Available in Weedy Green and Gravelly Brown
- Breaking strains: 15lb (6.8kg), 20lb (9kg), 25lb (11.3kg) and 35lb (15.8kg)
- 20m on a spool

## REFLEX™ CAMO

- Designed to be better than any other braided hooklinks currently available
- Features colour break camouflage pattern
- Very supple braided hooklink material that is ideal for use in Rapide PVA bags
- Sinks without need for putty
- Available in two colour options: Light Camo and Dark Camo
- Breaking strains available are: 15lb (6.8kg), 25lb (11.3kg) and 35lb (15.8kg)
- 20m per spool

## ILLUSION® TRANS KHAKI SOFT HOOKLINK

- Improved Illusion hooklink that features our revolutionary Trans Khaki camouflage
- Perfect for gin clear venues
- The most invisible hooklink Rob Hughes has ever dived over
- Fast sinking and supple
- High abrasion resistance and low stretch
- Great knot strength
- Perfect for a whole host of rig presentations
- Supplied on 50m spools
- Available in 12lb (5.45kg) and 15lb (6.8kg)

## RIGIDITY® TRANS KHAKI

- Improved version of the original Rigidity
- Features Trans Khaki camouflage for low visibility
- Stiffest Chod filament we have ever seen
- Perfect for Chod and Hinged Stiff Rigs
- Stiff nature makes it very hard for a carp to eject once it has been sucked in
- Whipping knot needs to be used with 30lb version
- Available in two breaking strains: 25lb (11.3kg) and 30lb (13.6kg)
- Supplied on 30m spools!

## ILLUSION® TRANS KHAKI FLUOROCARBON LEADER

- Features our revolutionary Trans Khaki camouflage
- Perfect leader material for gin clear venues
- Doubles up as effective hooklink material
- The most invisible fluorocarbon Rob Hughes has ever dived over
- Sinks like a brick and is incredibly supple meaning it hugs the contours of the lakebed giving the ultimate in concealed presentation
- High abrasion resistance and low stretch
- Great knot strength
- Supplied on 50m spools
- Available in 20lb (9kg) and 30lb (13.6kg)

## ZIG+ FLOATER HOOKLINK

- Designed specifically for floater fishing and Zig Rig fishing
- Made from a copolymer mono, which gives it an incredibly low diameter so it is very unobtrusive in the water
- Incredibly strong with great abrasion resistance
- Quite possibly the number one choice for Europe's best surface and Zig Rig anglers
- Available in 9lb, 12lb and 15lb

## ARMADILLO™

- Features colour break camouflage pattern
- Designed to be used as a braided snag/shock leader
- Great for distance casting or when fishing snaggy venues
- Available in Light Camo or Dark Camo
- New 65lb version available for extreme snag fishing conditions
- Available in either 30lb (13.6kg), 45lb (20.4kg) or 65lb (29.5kg) breaking strains
- 20m per spool

## LEADCORE SUBMERGE™

- Great alternative to leadcore and perfect for venues that ban leadcore
- Incredibly supple, yet sinks like and brick and hugs the contours of the lakebed
- Great abrasion resistance
- Very easy to splice and splices are incredibly strong
- Available in Gravelly Brown and Weedy Green
- Available in 30lb (13.6kg), 45lb (20.4kg) and 60lb (27.2kg) breaking strains

## FLUORO FUSED LEADER

- Fused fluorocarbon with a plastic outer coating
- Offer abrasion resistance and also aid concealment
- 75cm long, one leader per packet
- Supplied with Edges Kwik Change Swivels in size 7 and 10
- 30lb breaking strain
- Non-glare, anti-spook finish

## LEAD CLIP 30LB SUBMERGE LEADERS + K/C KIT

- Three 75cm lengths of Edges 30lb Submerge lead-free leader
- All three leaders have Trans Khaki Lead Clip and Tail Rubber in place
- Supplied with standard and Kwik Change swivel options
- Spliced loops at both ends so swivels can be changed via simple loop-to-loop connection
- Allows you to loop-to-loop straight to the swivel on one of our ready-tied rigs
- Available in Weedy Green and Gravelly Brown

## 30LB SUBMERGE HELI RIGS LEADERS + K/C KIT

- Three 75cm lengths of Edges 30lb Submerge lead-free leader
- All three leaders have Edges Trans Khaki Helicopter Rig components setup in place
- Features 3x Heli Buffer Sleeves, 3x 6mm Tapered Bore Bead, 3x length 0.5mm Leader Silicone
- Supplied with 3x Flexi Ring Swivel plus 3x Kwik Change Flexi Ring Swivels
- Spliced loops at both ends so swivels can be changed via simple loop-to-loop connection
- Allows you to loop-to-loop straight to the swivel on one of our ready-tied rigs
- Available in Weedy Green and Gravelly Brown

## LEADCORE HELI RIGS + K/C KIT

- Three 75cm lengths of Edges Camo Leadcore
- All three leaders have Edges Trans Khaki Helicopter Rig components setup in place
- Features 3x Heli Buffer Sleeves, 3x 6mm Tapered Bore Bead, 3x length 0.5mm Leader Silicone
- Supplied with 3x Flexi Ring
- Swivel plus 3x Kwik Change Flexi Ring Swivels
- Spliced loops at both ends so swivels can be changed via simple loop-to-loop connection
- Allows you to loop-to-loop straight to the swivel on one of our ready-tied rigs
- Available in Light or Dark Camo

## SUBMERGE LEADERS + K/C KIT

- Three 75cm lengths of Edges 30lb Submerge lead-free leader
- Supplied with three swivel options: standard, Flexi Ring and Kwik Change
- Spliced loops at both ends so swivels can be changed via simple loop-to-loop connection
- Allows you to loop-to-loop straight to the swivel on one of our ready-tied rigs
- Available in Weedy Green or Gravelly Brown

## LEADCORE LEADERS + K/C KIT

- Three 75cm lengths of Edges Camo Leadcore
- Supplied with three swivel options: standard, Flexi Ring and Kwik Change
- Spliced loops at both ends so swivels can be changed via simple loop-to-loop connection
- Allows you to loop-to-loop straight to the swivel on one of our ready-tied rigs
- Available in Light or Dark Camo

## LEAD CLIP LEADCORE LEADERS + K/C KIT

- Three 75cm lengths of Edges Camo Leadcore
- All three leaders have Trans Khaki Lead Clip and Tail Rubber in place
- Supplied with standard and Kwik Change swivel options
- Spliced loops at both ends so swivels can be changed via simple loop-to-loop connection
- Allows you to loop-to-loop straight to the swivel on one of our ready-tied rigs
- Available in Light or Dark Camo

## LEAD CLIP TUBING RIGS + K/C KIT

- Three 75cm lengths of Edges Camo Leadcore
- Supplied with three swivel options: standard, Flexi Ring and Kwik Change
- Spliced loops at both ends so swivels can be changed via simple loop-to-loop connection
- Allows you to loop-to-loop straight to the swivel on one of our ready-tied rigs
- Available in Light or Dark Camo

## MICRO RIG SWIVELS

- Perfect for mounting hookbaits onto when using D-Rig presentations
- Ideal for Chod and Hinged Stiff Rigs
- 20 per packet

## KWIK CHANGE SWIVELS

- Available in size 7 and 10
- Allows rigs to be changed without cutting and re-tying knots
- Anti-glare finish
- Perfect for use with Edges Safety and Slik lead clips
- 10 per packet

## SWIVELS

- Perfect for a host of rig applications
- Anti-glare finish
- Available in two sizes: 7 and 10
- 20 swivels per packet
- Perfect for use with Edges Safety (size 7) and Slik (size 10) lead clips

## DOUBLE RING SWIVEL

- Perfect for anglers that fish inline drop off setup but want to tie rig straight to swivel
- Size 7 swivel with anti glare finish
- 8 per packet

## KWIK CHANGE DROP OFF INLINE SWIVEL

- Unique design for anglers who want to fish inline drop off but still have quick range facility with their rigs
- Size 7 swivel with anti glare finish
- 8 per packet

## KWIK CHANGE 'O' RING

- Another design that is unique to the Edges range
- Designed for anglers that fish helicopter rigs but want to change hooklinks without cutting and tying knots
- Anti glare finish
- 10 per packet

## KURO MICROHOOK RING SWIVELS

- Perfect for mounting hookbaits onto when using D-Rig presentations
- Gives hookbaits greater flexibility and 360° movement
- Matt black Kuro coating
- Ideal for a host of rigs including 360°, Chod, Hinged Stiff and Multi Rig
- 10 per packet

## FLEXI RING SWIVELS

- Available in size 7, 10 and 11
- Anti-glare finish
- 10 per packet

## DROP OFF HELI BUFFER BEADS

- Versatile buffer bead that comprises three main components and is designed for helicopter-style lead setups
- Designed to work on both leaders and naked main line (simply add the tapered insert)
- Use without the tapered insert for lead-free/leadcore leaders
- Features Trans Khaki camouflage
- 6x Buffer Beads and 6x T-pegs per pack

## HELI BUFFER SLEEVE

- Designed for use with Helicopter Rigs on leaders such as Submerge and leadcore
- Small hole in the side allows you to set it up in a way for the lead to be ejected
- Features Trans Khaki camouflage
- 8 per packet

## HELI/CHOD BUFFER SLEEVE

- Designed for Chod Rigs and Helicopter Rigs when fishing with fluorocarbon or mono main line straight through
- The swivel of your rig will sit on the thin, tapered sleeve, which will absorb the pressure when playing a carp and prevent the swivel damaging the line
- Small hole in the side allows you to set it up in a way that allows the lead to be ejected
- Trans Khaki colour
- 6 per packet

## TUNGSTEN CHOD BEAD KIT

- Designed to allow anglers to tie a 'fixed' Naked Chod Rig on fluoro or mono main line
- The bead itself grips the line very strongly but can be moved the distance above the lead you require
- The bottom sleeve, sits over the lead and can be setup in way to eject the lead on a take
- When you hook a fish the bead slides down the line and slots into the top of the sleeve to protect your line during the fight
- Micro version available for anglers that like to scale down their end tackle
- Supplied with 6 sleeves and 6 beads per kit

## MICRO CHOD BEAD

- Designed to allow anglers to tie a 'fixed' Naked Chod Rig on fluoro or mono main line
- The bead itself grips the line very strongly but can be moved the distance above the lead you require
- The bottom sleeve, sits over the lead and can be setup in way to eject the lead on a take
- When you hook a fish the bead slides down the line and slots into the top of the sleeve to protect your line during the fight
- Supplied with 6 sleeves and 6 beads per kit

## DROP OFF LEAD PLUG & PINS

- Simply place the plug over your swivel and secure in place with T peg
- No longer need to cut inline lead insert in half when using Edges Drop Off Inline Lead Kit
- Means anglers can convert their drop off inline lead setup back to a standard inline lead setup should they wish to
- Designed to work with all Fox inline leads
- 10 plugs and 10 pins supplied per packet
- Feature Trans Khaki camouflage

## DROP OFF INLINE LEAD KIT

- Designed for use with all Fox inline leads
- Allows inline lead to eject from line when fishing snaggy or weedy venues
- Comes supplied with a tail rubber if you want to increase the amount of pressure required to eject the lead
- 5 inserts and 5 tail rubbers per kit

## BIG BORE DROP OFF INLINE LEAD KIT

- Designed with a larger bore for use with leadcore and larger diameter lead-free materials such as 60lb Edges Submerge
- Compatible with all Fox inline leads
- Allows inline lead to eject from line when fishing snaggy or weedy venues
- Comes supplied with a tail rubber if you want to increase the amount of pressure required to eject the lead
- 5 inserts and 5 tail rubbers per kit

## SAFETY LEAD CLIP TAIL RUBBER

- Trans Khaki Colour
- Designed for use with size 7 Safety Lead Clip
- Small cut away section allows easier ejection of lead
- 10 per packet

## SAFETY LEAD CLIP

- Trans Khaki colour
- Designed for use with a size 7 swivel
- 'Self-aligning' swivel design, which means the eye of the swivel always sits in line with the hole in the lead clip
- Fixes to swivel with T-peg (supplied)
- Serrations on the lug allows for adjustable tension
- 10 per packet

## SLIK® LEAD CLIP TAIL RUBBER

- Trans Khaki Colour
- Designed for use with size 10 Slik Lead Clip
- Small cut away section allows easier ejection of lead
- 10 per packet

## SLIK® SAFETY LEAD CLIP

- Trans Khaki colour
- Smaller lead clip designed to work with size 10 swivels making them perfect for delicate presentations
- 'Self-aligning' swivel design, which means the eye of the swivel always sits in line with the hole in the lead clip
- Fixes to swivel with T-peg (supplied)
- No serrations on the lug ensures that the tail rubber slips off easily
- Perfect for weedy and snaggy venues where ejecting the lead on a take is vital
- 10 per packet

## POWER GRIP LEAD CLIP KIT

- Handy kit that includes everything needed for creating a lead clip setup
- Includes following Edges Trans Khaki products: Power Grip Tail Rubbers, size 7 Lead Clips with T pegs, standard Anti Tangle Sleeves
- Also supplied with both standard size 7 swivels and size 7 Kwik Change Swivels
- Five of every component supplied in kit

## POWER GRIP NAKED LINE TAIL RUBBER

- Tougher grip on lead clip for use with heavier leads
- Fine taper at rear of tail rubber for use with fluorocarbon leaders or fishing main line straight through
- Helps to prevent hooklinks from tangling around the tail rubber
- Ideal for long rigs such as Zig Rigs
- Trans Khaki camouflage
- Designed for use with size 7 lead clips
- 10 per packet

## NAKED LINE TAIL RUBBERS

- Fine taper at rear of tail rubber for use with fluorocarbon leaders or fishing 'naked' main line straight through
- Helps to prevent hooklinks from tangling around the tail rubber
- Ideal for long rigs such as Zig Rigs
- Front of tail rubber features cut away section to aid lead ejection
- Trans Khaki camouflage
- 10 per packet

## POWER GRIP TAIL RUBBERS

- Designed for anglers that like to use heavy leads ensuring lead doesn't eject on impact with water after a cast but still ejects when comes into contact with snag/weed
- Designed to work with a size 7 Edges Lead Clip
- Trans Khaki camouflage
- 10 per packet

## TADPOLE MULTI BEAD

- Trans Khaki colour
- Perfect for creating semi-fixed running setup with inline leads
- 10 per packet

## RUN RING KIT

- Simple design to create a basic running rig
- Large ring for friction free movement
- Allows great bite indication
- Features 8x Rings, 8x Buffer Beads and 8x Speed Links
- Features Trans Khaki camouflage

## RUNNING SAFETY CLIP

- Features Trans Khaki camouflage
- Designed to allow you to create the perfect running rig presentation
- T-bar peg to lock the swivel in place inside main clip
- The clip is sculpted to allow the lead to hang straight for increased casting distance
- Tail rubber is designed to be used with both leadcore style leaders and tubing
- Kit includes a Run Ring and Speed Link so you can attach your lead of choice
- Pack size: 6

## TULIP BEADS

- Perfect for use with running rigs
- Angled to allow lead to sit at optimum angle for tangle-free casts
- Can also be used as a buffer bead on marker float set up
- Trans Khaki camouflage

## ANGLED DROP OFF RUN RIG KIT

- Unique design that takes running rigs to another level
- Angled, large ring sits in perfect place to allow line to run through unhindered
- Can be set up to eject the lead when fishing weedy or snaggy venues
- Trans Khaki camouflage
- Includes 6x Angled Clips, 6x Angled Buffer Sleeves and 6x T-Pegs

## TRANS KHAKI ANTI TANGLE SLEEVES

- Trans Khaki colour
- Designed to help prevent rigs from tangling on cast
- Standard sleeve ideal for normal every day rig presentations
- Micro sleeve available for solid PVA bag fishing
- XL sleeve ideal for use with long hooklinks such as Zig Rigs
- 25 per packet (Micro and Standard), 15 per packet (XL)

## TUNGSTEN ANTI TANGLE

- Designed to help prevent tangles occurring on the cast
- Added weight of tungsten helps to keep your hooklink pinned to the lakebed
- Available in Standard and Micro sizes
- 8 sleeves per packet

## LOADED TUNGSTEN TUBE

- Four times heavier than leadcore
- Very supple so hugs the lakebed very well
- Perfect for venues where leadcore is banned
- Very easy to thread onto your main line
- Supplied in 2m length

## ANTI-TANGLE TUBING TRANS KHAKI

- Features revolutionary Trans Khaki camouflage
- Perfect for venues where leadcore is banned
- Added protection from abrasion and tangles
- Incredibly fish-friendly
- Supplied in 2m length

## TAPERED MAINLINE STOP

- Large tapered stop for use on main line, which you can then place a 5mm Tungsten Bead onto when fishing Chod or Helicopter Rigs 'naked' style
- Taper allows hooklink swivel to dislodge bead easier making it safer than conventional designs
- Supplied on wire loop
- 9 per packet

## TUNGSTEN HOOKLINK SINKERS

- Designed to mimic look for tungsten putty on hooklink
- Ideal for helping to pin your hooklink to lakebed
- Supplied on wire loop
- 9 per packet

## TUNGSTEN LINE GUARD BEADS

- Designed for use directly onto naked main line
- Can be fixed up the line for use with Naked Chod Rigs (will slide down and sit on top of Heli Buffer Sleeve once a fish is hooked)
- Can also be positioned directly on top of a Heli Buffer Sleeve when fishing naked helicopter-style rigs
- Handy tapered side that your hooklink swivel sits on during the fight to keep main line protected
- Tungsten content helps to sink them to lakebed
- Supplied on wire loop for easy loading to main line
- 8 beads per packet

## 5MM TUNGSTEN BEAD

- 5mm bead made from tungsten
- Designed to fit neatly onto the Tapered Mainline Stop
- 15 beads per packet

## TAPERED BORE BEADS

- Available in 6mm and 4mm
- Feature Trans Khaki camouflage
- 4mm designed to grip leadcore when using Helicopter and Chod Rigs
- 6mm beads perfect for acting as a buffer to protect knots
- 6mm beads can also be placed on silicone on a leader when using Chod and Helicopter Rigs
- 30 beads per packet

## TUNGSTEN POWERGRIP® PUTTY

- Extremely dense
- Very easy to work with
- Perfect for counterbalancing pop-ups and pinning rigs to lakebed
- Widely regarded as best on the market

## BAIT BUNGS

- Designed to prevent a hookbait sliding down the Hair towards the hook
- Especially useful when using snowman presentation to keep two baits next to each other on the Hair
- Simply slide onto the hooklink before tying the loop on the Hair
- Supplied on wire loops
- 10 bungs per packet

## ANTI BORE BAIT INSERTS

- Unique design that is pushed into base of hookbait to prevent Hair erosion
- Ideal for boilies and soft hookbaits such as meat
- Comes into its own when repeatedly casting out and reeling in
- Micro serrations on tube ensure rock solid fit
- Can be cut down to fit smaller baits

## SILICONE SLEEVES

- 3mm bore in 25mm lengths
- Features Trans Khaki camouflage
- Perfect for numerous rig applications such as placing over Speed Links
- 15 lengths per packet

## HOOK SILICONE

- Designed for trapping Hair on shank of hook for blow back rigs
- Features Trans Khaki Camouflage
- Supplied in 1.5m lengths
- Two sizes available for different hook sizes: 10-7 and 6-2

## SHRINK TUBE

- Perfect for extending shank of hook when making anti-eject rigs
- Trans Khaki colour
- Available in three sizes: X Small (1.4-0.6mm), Small (1.8-0.7mm) and Medium (2.4-0.8mm)

## WITHY CURVES

- Pre-curved adaptor set at perfect angle for Withy Pool Rig
- Threads onto hooklink via splicing needle
- Features Trans Khaki camouflage
- Micro serrations on the end of the sleeve for tungsten putty to mould around to counter balance your pop-up hookbait
- No longer need to shrink tubing down over a kettle to create this all-time classic rig!
- Two sizes available for different hook sizes: 10-7 and 6-2
- 10 per packet

## LINE ALIGNA

- Makes creating a line aligner presentation easier than ever before
- Features Trans Khaki camouflage
- Simply slide an Aligna down your hooklink and over the eye of your hook
- Creates an aggressive hooking angle that carp find very hard to eject
- Two sizes available for different hook sizes: 10-7 and 6-2
- 10 per packet

## MICRO LINE ALIGNAS

- More refined version of the hugely popular Trans Khaki Line Alignas
- Ideal for anglers that wish to fish scaled-down, delicate presentations
- Eliminates need for shrink tube
- Helps to create perfect aggressive hooking angle
- Available in two sizes: 10-7 and 6-2
- 10 per packet

## HAIR WIDGETS

- Design to tightly grip shank of hook
- Enables Hair rig to be created without tying knotless knot
- Simply tie a supple hair to the Hair Widget and position it in chosen place on hook
- Features Trans Khaki camouflage
- 30 per packet

## HOOK BEADS

- Trans Khaki Colour, 25 beads per packet
- Ideal for blowback presentation where a knotless knot isn't used
- Grip the shank of the hook very tightly
- Available in two sizes: 7-10 and 2-6

## HEAVY DUTY 'O' RING

- Designed for use when setting up Helicopter and Chod Rigs to eject the lead on the take
- Anti glare finish
- 15 per packet

## KURO RIG RINGS

- Perfect for a host of rig applications including creating Blowback Rigs
- Feature matt black Kuro coating
- Available in three sizes: Small (2.5mm), Medium (3.2mm) and Large (3.7mm)
- 25 rings per packet

## SPEED LINKS

- Designed to allow quick changing of rigs
- Can also be used for quick changing of items such as marker floats and spods
- Available in two sizes: Standard and Micro
- 20 Speed Links per packet

## MICRO SPEED LINKS

- Scaled down version of original Speed Link
- Designed to allow quick changing of rigs
- Can also be used for quick changing of items such as marker floats and spods
- 20 per packet

## RIG LINKS

- Designed to replace loop knots on end of rig
- Simply tie Rig Link to end of rig with a Grinner Knot
- Allows rigs to be changed in double-quick time
- Enables PVA sticks to be threaded down hooklink
- 15 per packet

## MAGGOT CLIPS

- Designed for easy presentation of maggots on Hair Rigs
- Unique arrowhead shape to prevent maggots bunching up
- Feature chemically sharpened points with non-rust finish
- Available in four sizes: 6, 8, 10 and 12
- 10 clips per packet

## HAIR BRAID

- Designed to allow anglers to create super-supple Hair Rigs
- Discreet brown colour
- Perfect when using small, lightweight hookbaits
- Supplied in 10m lengths

## MULTI PURPOSE BACKLEAD

- Can be used as a quick-change flying backlead or converted into a traditional 'clip on' backlead.
- To change, simply remove the quick-change flying insert from the lead and replace with the 'clip-on' backlead insert by pushing it into the core, twist the insert once in place to ensure lead cannot come off
- If the 'clip-on' backlead should become snagged, it is designed to release from the line as the clip will spring open, releasing your line
- When used in flying backlead mode it has been designed not to fly too far back up the line like other makes currently do, this helps to ensure that the line closest to your rig will be pinned down
- Perfect for pinning your line to the lakebed when fishing for line-shy carp, also ideal when fishing on venues with boat traffic to keep the line out of harm's way
- Available in three sizes: 5g, 10g and 15g
- Each pack contains 4x leads, 4x flying backlead inserts and 4x 'clip-on' backlead inserts

## KWIK CHANGE POP-UP WEIGHTS

- Pop-up counter weight system
- Easy to attach to hooklinks without causing any damage
- Weights simply attach to small silicone length that is supplied on dispensers
- Available as individual weights: BB, AAA, SA and Swan
- Six division dispenser also available featuring No.1, No.4, BB, AAA, SA and Swan

## CAPTIVE BACK LEADS MK2

- Perfect for angler who wish to keep their line concealed
- Patented line clip allows for smooth line release
- Heavier options allow you to fish with tighter lines for better indication
- Supplied on own winder
- Comes supplied with 10m highly visual orange cord
- Cord freely dispenses from winder

## SLIDERS

- Tapered flying back leads for rig-shy carp
- Features camouflage pattern
- Simply thread onto main line above leader
- 10 sliders per packet

## DOWN RIGGER BACKLEADS

- Unique backlead system that can be attached to main line with one hand
- Available in two sizes: 21g and 43g
- Three backleads per packet

## BOILIE STOPS

- Feature tapered ends for easy placing into Hair loop
- Small and discreet on top of boilie
- Clear colour
- Available in two sizes: Micro and Standard
- 200 boilie stops per packet

## HAIR EXTENDING BOILIE PROPS

- Allows you to change the size of your hookbait without tying a new Hair Rig
- Three sizes per packet: Small, Medium and Large
- Clear colour

## BOILIE CAPS

- Mini hook on base that pulls up into hookbait
- Makes it very hard for nuisance species to dislodge bait from Hair
- Small, clear cap almost disappears on top of bait
- 120 Boilie Caps per packet

## PELLET PEGS

- Designed for securing pellets in place on Hair Rigs
- Low-vis clear colour
- Available in three sizes: 11mm (180 pegs), 13mm (134 pegs) and 21mm (50 pegs)

## LEADER SILICONE

- Designed for use on Submerge and leadcore leaders for Helicopter Rigs
- 0.5mm in diameter
- Features Trans Khaki camouflage
- Supplied in 1.5m length

## BAIT FLOSS

- Designed for attaching hookbaits to rig rings and Mini Hook Ring Swivels
- Neutral colour
- Supplied in dispenser with built-in cutter
- 50m per spool

## MARKER ELASTIC

- Red elastic supplied on a 20m spool
- Perfect for marking fishing lines to ensure accurate casting and bait placement
- Very easy to work with, grips the line without damaging it
- Easy to remove from line again without damaging it

## FINE NEEDLE

- Perfect for delicate hookbaits such as particles
- Also suited to soft, small 6-10mm boilies
- Soft-touch easy grip, green handle

## GATED NEEDLE

- Gate latch baiting needle for use with variety of hookbaits
- Also helpful for threading small PVA bags onto hooklink
- Soft-touch easy grip, yellow handle

## HEAVY NEEDLE

- Perfect for tougher hookbaits such as boilies and nuts
- Soft-touch easy grip, red handle

## SPLICING NEEDLE

- Fine gate latch needle for splicing leadcore and lead-free materials
- Can also be used as a baiting needle for small, soft, delicate hookbaits
- Soft-touch easy grip, blue handle

## EASY SPLICE NEEDLE

- Twisted stainless steel wire designed for splicing leadcore and lead-free leader materials as well as splicing Edges Camo-Splice hooklink material
- Diamond shaped for ease of use

## NEEDLE SET

- Five-piece needle set that features everything you need
- Comprises Stix & Stringer, Fine, Heavy, Gated and Splicing needles

## STIX & STRINGER NEEDLE

- Extra long gate latch needle
- Ideal for creating PVA stringers
- Also suited to threading PVA sticks onto hooklinks

## 1MM MICRO DRILL

- Designed for drilling ultra fine holes into hookbaits
- Allows you create a bore in a hard bait for your baiting needle
- Perfect for hard baits such as nuts, air-dried boilies and corkball pop-ups
- Ergonomically designed highly visual handle

## MULTI TOOL

- Handy device that features four tools in one!
- One end is a line stripper for removing outer coating from coated braids
- Tension hook on opposite end to stripper, which is used for tightening knots and straightening stiff materials
- Also features small D-Rig spike for opening out and creating a neat D shape

## BRAID BLADES

- Super-sharp blades for effortless cutting of braided materials
- Also great for cutting materials like fluorocarbon, nylon and leader materials
- Hi-vis orange handle to prevent you losing them in the grass etc

## BRAID BLADES XS

- Saw-toothed blades designed to cut easily through all manner of materials including braid, nylon, stiff mono, fluorocarbon, leadcore and coated braid
- Razor-sharp
- Handy locking clip to keep them closed when not in use
- Fit neatly into your F Box tackle box

## TENSION BAR

- Handy tool for tightening loops
- Also useful when straightening out boom sections on stiff rigs
- Ergonomic grip

## BAIT DRILL & CORK STICKS

- Small drill that is used to bore out hookbaits
- Ideal for baits such as boilies and tiger nuts
- Ergonomic handle on drill for easy use
- Supplied with 5 Cork Sticks (6mm) for inserting into baits to give them increased buoyancy
- 6mm Cork Sticks also available to purchase separately

## ZIG ALIGNA™ KIT

- 3 lengths of Zig Aligna HD Foam
- 6 Zig Aligna Sleeves
- 1x Loading Tool

## ZIG ALIGNA™ LOADING TOOLS

- Designed for loading foam into loop on back of Zig Aligna
- Hi-vis orange colour
- 2 per packet

## ZIG ALIGNA™ HD FOAM

- Available in Red, Yellow, Black, Fluoro Pink, Fluoro Yellow and Fluoro Orange
- 3 lengths of foam per packet
- Ultra buoyant

## ZIG ALIGNA™ SLEEVES

- Available in Red, Yellow, Black, Brown, Pink, Fluoro Pink, Fluoro Yellow and Fluoro Orange
- 8 Zig Aligna Sleeves per packet

## ZIG ALIGNA™ BENEFITS

- Better hookholds and anti-eject properties - Creates a much wider gape than a standard knotless knot or Zig Bug style hook (no fluff or foam impeding hook point penetration), for much better hooking potential
- Better hooking potential - The Aligna allows your hookbait to sit centralised at all times, a downside with a knotless knot on light mono is that the Hair naturally wants to sit off to one side, which can lead to poor hook holds
- Stronger more reliable knots can be used - Allows you to attach your hook to your hooklink with a Palomar or Grinner Knot rather than a Knotless Knot, which are much stronger and also prevents the eye of your hook from rubbing on and weakening the hooklink when playing a fish
- Far greater value for money - Should your hookpoint turn over you can simply slide the Aligna up your hooklink and attach a new hook - with Zig Bug style hookbaits once the point has gone they have to be thrown away, which can get very expensive
- Very versatile - You can mix and match the colours of foam and Zig Aligna to create a whole host of hookbait colour options until you find the combo that works the best on any given day
- Very quick and easy - Changing of your hookbait is very quick to do and swapping hookbaits is also very fast thanks to the unique loading tool
- Imitate shape of emerging larvae - Most Zig Bug style hookbaits imitate creatures that live out of the water, which is a pretty pointless imitation as they are not natural! The shape of the Zig Aligna combined with a foam insert very much replicates the shape of a nymph with a thin curved body and a big head
- Hi-Vis colour options - The red, pink, white and yellow options allow you to create hi-viz hookbaits when single hookbait fishing or spodding a slop over the top

NEW

**BLACK**  
LABEL EDITION

**Mini Swinger®**

**FEATURES**

Gate latch line clip - Adjustable sliding weight - Compatible with all Black Label hockey sticks  
Seven colours - Betalight slot - Presentation Cases available
